When your complexion looks tired and stressed, a spa facial can provide the revitalization you need, but who has the time? Exclusive patented technology gives you an at-home alternative to spa treatments—in just five minutes—with the Galvanic Spa Instrument and specially formulated facial gels. Pre-Treat Gel helps remove impurities so your pores can breathe and prepares your skin for Treatment Gel. Newly reformulated Treatment Gel contains all the benefits of the original and now features ageLOC technology, a proprietary new ingredient blend that helps slow the signs of aging at their source. Get results that you can see now with benefits that last into the future.

Now you have the power to change the past, present, and future of your skin. Our most advanced and complete anti-aging system infuses your skin with the power of ageLOC on a daily basis to target aging at its source. Together, these premier products work together to reveal younger looking skin in eight ways — for a more youthful, healthier looking you now and in the future.

Microdermabrasion to go! Polishing Peel™ Skin Refinisher is clinically proven to provide results equivalent to a professional microdermabrasion session. Featuring pumpkin enzymes and bentonite clay, Polishing Peel™ delivers a smoother, more polished appearance—instantly. It's clinical skin care without the clinic!

For those who need more than a moisturizer, Epoch® Sole Solution™ restores smooth, healthy looking feet. Based on knowledge gleaned from Central American healers, Sole Solution incorporates crushed allspice berry. These indigenous people picked allspice berries and mixed them with a combination of oils to relieve feet of severe dryness and cracking brought on by the extreme conditions imposed upon their feet.

The patented Pharmanex BioPhotonic Scanner is a cutting-edge testing tool that noninvasively measures carotenoid levels in living tissue, providing an immediate indication of a person's overall carotenoid antioxidant levels.
